QUALITY, WE TOGETHER!

SOFIVA is in compliance with three laboratory certification qualifications

-Continuously adding new certification categories and qualifications-

Crises and opportunities

Strengths

- Long-term compliance with multiple laboratory certifications.
- Well-equipped personnel with strong capabilities.
- A wide range of testing items, covering various fields and disciplines

Weakness

- Personnel qualifications
- √ Expanding the number of Clinical Scientists will require time.
- Certification acquisition
- √ Implementing certification qualifications will also require time

Opportunities

 Already compliance with certification qualifications

√ The most competitive brand

 Concentration of market share and a bigger customer base

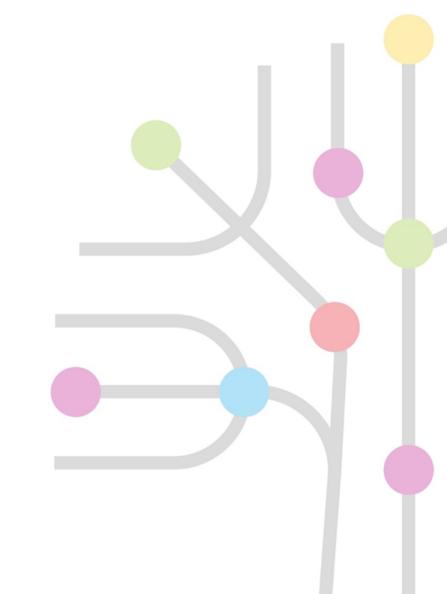

Threats

- Time gap in laboratory certification implementation poses risks of customer attrition.
- Overseas laboratories have more lenient conditions.
